

**Product Bulletin No: 1601**

**19 January 2016**

**Announcement :** This bulletin announces the extension of measuring range of STYRENE Detector tube SST-4L (CF000787).

This bulletin will take immediate effect and is applicable to STYRENE Detector tube. SST-4L.

**Change:** The Styrene detector tube having a measuring range of 25 - 250 ppm, has been improved to detect 2.5 ppm of Styrene with double stroke and 500 ppm with half stroke. The tube scale range is 5 - 250 ppm. The tube code / order code will remain the same as SST-4L(CF000787).

The revised tube datasheet for SST-4L is also being attached herewith.
